Module Name: Instagram Application – Boundary Value Analysis & Equivalence Partitioning

Test Case ID:	TC_INSTAGRAM_001
Tester Name:	Madhavi
Test Case	Apply Boundary Value Analysis (BVA)
Prerequisites:	1. Stable internet connection
Environment	OS: Windows / Android / iOS

Scenario ID	Scenario	Test Steps	Test Input	Expected Results	Actual Results	Status	Comments
1A	Username/Email – Valid Partition	1. Open Instagram Login Page 2. Enter valid username/email 3. Enter valid password 4. Submit	Valid username/email	Valid detail should be accepted and login should proceed	Valid detail accepted	Pass	Equivalence Partitioning – valid class
1B	Username/Email – Blank Partition	1. Open Instagram Login Page 2. Keep username/email blank 3. Submit	Blank username/email	Validation should be displayed	Validation displayed	Pass	Equivalence Partitioning – blank class
1C	Username/Email – Invalid Partition	1. Open Instagram Login Page 2. Enter invalid username/email 3. Submit	Invalid username/email	Invalid detail should be rejected	Invalid detail rejected	Pass	Equivalence Partitioning – invalid class
2A	Password – Less Than Required (BVA)	1. Enter valid username 2. Enter password less than required 3. Submit	Password below required length	Password should be rejected / validation should be displayed	Password accepted	Fail	Boundary Value Analysis – below boundary
2B	Password – Exact Required (BVA)	1. Enter valid username 2. Enter password at required length 3. Submit	Password at exact required length	Password should be accepted if other details are valid	Password accepted	Pass	Boundary Value Analysis – exact boundary
2C	Password – Blank Partition	1. Enter valid username 2. Keep password blank 3. Submit	Blank password	Validation should be displayed	Validation displayed	Pass	Equivalence Partitioning – blank class
3A	Authentication – Valid Username & Password	1. Enter valid username 2. Enter valid password 3. Submit	Valid username + valid password	Login should be successful	Login Successful	Pass	Authentication positive case
3B	Authentication – Valid Username & Incorrect Password	1. Enter valid username 2. Enter incorrect password 3. Submit	Valid username + incorrect password	Login should be rejected	Login Rejected	Pass	Authentication negative case
3C	Authentication – Invalid Username & Correct Password	1. Enter invalid username 2. Enter correct password 3. Submit	Invalid username + correct password	Login should be rejected	Login Rejected	Pass	Authentication negative case
3D	Authentication – Both Blank	1. Keep username blank 2. Keep password blank 3. Submit	Blank username + blank password	Validation should be displayed	No validation displayed	Fail	Authentication – blank input case
