Tester Name:	Niharika
Test Case Description:	To validate the functionality of user registration and login workflows on Facebook's desktop login page, and
Prerequisites:	1. Stable internet connection 2. Browsers for cross browser testing 3. Valid URL for the login and sign-up page 4. Test user credentials
Environment Information:	OS: macOS (Sequoia15.5) System: Laptop (MacBook Air) Webpage URL: https://www.facebook.com

Scenario ID	Scenario	Test Steps
2c	Try login with empty fields	1. Click on Log In 2. Leave Email/Mobile blank 3. Leave Password blank 4. Click Log In
2d	Login with invalid/unregistered account	1. Click on Log In 2. Enter an unregistered Email/Mobile Number 3. Enter a password 4. Click Log In
2e	Forgot password/account recovery flow	1. Click on Log In 2. Click Forgot password? 3. Enter registered Email/Mobile or account identifier 4. Continue with recovery steps

Test Input	Expected Results	Actual Results
Valid First Name, Last Name, Email/Mobile, Date of Birth, Gender, Password	Account should be created successfully and user should proceed to the appropriate verification/onboarding step.	Account registration flow completed successfully
Email/Mobile already linked to an existing Facebook account	System should show an appropriate message that the Email/Mobile is already associated with an account.	Existing account message displayed
Invalid email/mobile format	Validation error should be displayed and registration should not proceed.	Validation error displayed

Test Input	Expected Results	Actual Results
Whitespace-only input	Whitespace-only values should be treated as empty/invalid and validation should be displayed.	Validation displayed
Weak password such as 12345	Password requirement/error message should be shown and registration should not proceed unless rules are satisfied.	Password validation displayed
Test password	Password visibility should toggle correctly without changing the entered password.	Password visibility toggled correctly

Test Input	Expected Results	Actual Results
Desktop and mobile screen sizes	Form should adapt to screen size and remain responsive and usable.	Form remained responsive and usable
Correct registered Email/Mobile and Password	User should log in successfully and land on the appropriate Facebook home/feed experience.	Login successful
Valid Email/Mobile + wrong Password	Error message should be shown and login should not succeed.	Error message displayed

Test Input	Expected Results	Actual Results
Blank input	Login should be prevented and appropriate validation should be displayed.	Login prevented
Unregistered Email/Mobile + password	Login should fail and an appropriate account/error message should be displayed.	Login failed with appropriate message
Valid registered account identifier	Recovery process should start and the next reset/recovery steps should be shown.	Recovery process started
